

RH302 RHCE Certification Lab Exam

Prospective enrollees in RH302 should consider taking one or more of Red Hat's RHCE courses in preparation for the exam, but these courses are not required. Candidates are also advised that real-world system administration experience is an important aspect of preparation for the exam, and that study without such experience is unlikely to result in success.

The certification exam consists of three parts conducted in a single day. Two of the three sections of the exam are *performance-based*, meaning that candidates must perform tasks on a live system, rather than answering questions.

The RHCE Exam consists of three sections:

- Section I:** Troubleshooting (2.5 hours)
- Section II:** Multiple Choice (1.0 hour), and
- Section III:** Installation and Configuration (2.5 hours)

In order to pass the Red Hat Certified Engineer exam on Red Hat Linux 9 attendees must meet the following requirements: a) an average score of 80 or higher across all three sections, equally weighted; b) no section score lower than 50 points; c) 70 percent or more on the RHCT-level skills and 70 percent or more on the RHCE-level skills in Section III.

Audience:

The audience for RH302 includes the following:

- people who have taken the exam before but have not passed it
- people who have taken the Standard Track as preparation for the exam
- people who have taken the RH301 Red Hat Linux Rapid Track course
- people who have taken the exam under an earlier version of Red Hat Linux, but are conversant in the current version and wish to update their certification
- people with extensive system administration experience on Red Hat Linux

Course Summary:

The Certification Lab Exam is bundled with RH300, but if you are already an expert with Red Hat Linux 9, you may skip the course and just take the Exam.

Duration:

1 day

Start Time: 9:00 a.m. End Time:4:30-5:00 p.m. (depending on individual progress)
